NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

1. COMPANY INFORMATION

Viet Nam Vegetable Oil Industry Corporation – Joint Stock Company ("the Corporation") was equitized under Decision No. 446/QĐ-TTg dated March 31, 2014, by the Prime Minister of the Government and was granted the Business Registration Certificate for a Joint Stock Company No. 0300585984 on December 31, 2014, by the Ho Chi Minh City Department of Planning and Investment, and subsequent amendments to the Business Registration Certificates.

The principal activities during the current period of the Corporation are the production and trading of vegetable oil.

The Corporation's normal operating cycle is 12 months.

The Corporation has its registered head office at No. 58 Nguyen Binh Khiem, Da Kao Ward, District 1, Ho Chi Minh City, Vietnam, and one (01) branch located at No. 138 - 142 Hai Ba Trung, Da Kao Ward, District 1, Ho Chi Minh City, Vietnam.

The number of employees at the Corporation as of December 31, 2024, is 57 (December 31, 2023: 66).

2. PRESENTATION BASIS

2.1 *Applied accounting standards and regimes*

The Corporation's interim financial statements are presented in Vietnamese Dong ("VND") in accordance with the accounting regime of Vietnamese enterprises, Vietnamese Accounting Standard No. 27 – Interim Financial Reporting, and other Vietnamese Accounting Standards issued by the Ministry of Finance according to:

- ▶ Decision No. 149/2001/QĐ-BTC dated December 31, 2001, on the issuance of four Vietnamese Accounting Standards (Phase 1);
- ▶ Decision No. 165/2002/QĐ-BTC dated December 31, 2002, on the issuance of six Vietnamese Accounting Standards (Phase 2);
- ▶ Decision No. 234/2003/QĐ-BTC dated December 30, 2003, on the issuance of six Vietnamese Accounting Standards (Phase 3);
- ▶ Decision No. 12/2005/QĐ-BTC dated February 15, 2005, on the issuance of six Vietnamese Accounting Standards (Phase 4); and
- ▶ Decision No. 100/2005/QĐ-BTC dated December 28, 2005, on the issuance of four Vietnamese Accounting Standards (Phase 5).

Accordingly, the interim financial statements are presented along with and the use of financial statements is not intended for parties not provided with information on the procedures, principles, and accounting practices in Vietnam, and furthermore, are not intended to present the financial position, results of operations, and cash flows according to the principles and accounting practices widely accepted in other countries and territories outside of Vietnam.

2.2 *Applied accounting book forms*

The accounting book form applied by the Corporation is General Journal.

2.3 *Fiscal year*

The Corporation's fiscal year starts on January 1 and ends on December 31.

2.4 *Accounting currency unit*

The interim financial statements are prepared in the accounting currency used by the Corporation, which is VND.

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand, bank deposits, and highly liquid investments not exceeding 3 months that are readily convertible to known amounts of cash, and which are subject to insignificant risk of changes in value.

3.2 Inventories

Inventories are stated at the lower of cost to bring each product to its current location and condition and net realizable value.

Net realizable value represents the estimated selling price of inventories in the ordinary course of business, less the estimated costs of completion and selling expenses.

The Company applies the perpetual inventory system for accounting, with inventory values determined as follows:

- Raw materials, merchandise - Actual cost using the weighted average method.
- Finished goods and work in progress - Actual costs of raw materials and direct labor, along with related production overhead allocated based on normal activity levels, using the weighted average method.

Provision for devaluation of inventories

Provision for devaluation of inventories is established for the expected losses due to decreases in value (e.g., price declines, damage, quality issues, obsolescence) of raw materials, finished goods, and merchandise owned by the Company, based on reasonable evidence of impairment at the reporting date.

Increases or decreases in the balance of this provision are recognized as cost of goods sold in the Income Statements.

3.3 Accounts Receivable

Accounts receivable are presented in the financial statements at their carrying amount, including trade receivables and other receivables, together with a provision for doubtful debts.

The provision for doubtful debts represents the portion of accounts receivable that the Company estimates to be uncollectible as of the reporting date. Increases or decreases in the balance of the provision are recorded under general administrative expenses in the Income Statements.

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont)

3.4 Tangible fixed assets

Tangible fixed assets are stated at historical cost less accumulated depreciation.

The cost of a tangible fixed asset comprises its purchase price and any costs directly attributable to bringing the asset to its working condition for its intended use.

The costs of purchasing, upgrading, and renewing tangible fixed assets are recorded as an increase in the asset's original cost, and maintenance and repair expenses are accounted for in the income statement when incurred.

When a tangible fixed asset is sold or disposed of, any gain or loss resulting from the disposal of the asset (which is the difference between the net proceeds from the sale and the asset's carrying amount) is recognized in the income statement.

3.5 Intangible Fixed Assets

Intangible fixed assets are recognized at their original cost less accumulated amortization.

The original cost of intangible fixed assets includes the purchase price and any costs directly related to bringing the asset to its working condition for its intended use.

Expenditure on upgrading and renewing intangible fixed assets is added to the original cost of the asset, while other expenses are recognized in the income statement when incurred.

When an intangible fixed asset is sold or disposed of, any gain or loss arising from the disposal of the asset (which is the difference between the net proceeds from the sale and the asset's carrying amount) is recognized in the income statement.

Land Use Rights

Land use rights are recognized as intangible fixed assets, including the value of land use rights acquired or leased by the Corporation. The useful life of land use rights is assessed based on the duration of the land use rights. Accordingly, land use rights with a time limit are leased rights, which are amortized in the income statement over the lease term. Land use rights without a time limit are not amortized.

Prepaid land rents for land lease agreements effective before 2003 and for which land use rights certificates have been issued are recognized as intangible fixed assets in accordance with the provisions of Circular No. 45/2013/TT-BTC issued by the Ministry of Finance on April 25, 2013, guiding the management, use, and depreciation of fixed assets ("Circular 45").

3.6 Depreciation and Amortization

Depreciation of tangible fixed assets and amortization of intangible fixed assets are calculated using the straight-line method over the estimated useful life of the assets as follows:

Buildings and structures	6 - 50 years
Machinery and equipment	5 - 12 years
Office equipment	3 - 5 years
Land use rights	25 years
Computer software	2 - 8 years

3.7 Investment Property

Investment property is presented at its original cost, including any transaction costs, less accumulated depreciation.

Expenditures related to investment property incurred after initial recognition are added to the carrying amount of the investment property when the Corporation is able to derive future economic benefits from the property that exceed its initially assessed performance.

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT)

3.7 *Investment Property (continued)*

Depreciation of investment property is calculated using the straight-line method over the estimated useful life of the properties as follows:

Buildings and structures	50 years
--------------------------	----------

Investment property is no longer presented on the balance sheet after it is sold or when the investment property is no longer in use and is deemed to no longer generate future economic benefits from its disposal.

A transfer from owner-occupied property or inventory to investment property occurs only when there is a change in the intended use, such as when the owner discontinues use of the asset and begins leasing it to another party or when the construction phase is completed. A transfer from investment property to owner-occupied property or inventory occurs only when there is a change in the intended use, such as when the owner begins using the property or starts to prepare it for sale. A transfer from investment property to owner-occupied property or inventory does not change the original cost or the carrying amount of the property at the date of transfer.

3.8 *Borrowing Costs*

Borrowing costs include interest on loans and other expenses directly related to the Corporation's borrowings, and are recognized as expenses incurred during the period.

3.9 *Prepaid Expenses*

Prepaid expenses include short-term or long-term prepaid expenses on the balance sheet and are amortized over the period of prepayment or the period during which the related economic benefits are expected to be realized from these costs.

3.10 *Investments*

Investments in Associated Companies

Investments in associated companies where the Corporation has significant influence are presented using the cost method.

Distributions from the accumulated net profit of associated companies after the Corporation has significant influence are recognized in the income statement. Other distributions are considered as part of the recovery of the investment and are deducted from the investment's carrying amount.

Investments in Other Entities

Investments in other entities are recognized at cost.

Held-to-Maturity Investments

Held-to-maturity investments are recognized at cost. After initial recognition, these investments are reported at their recoverable amount. Any impairment loss on these investments, if incurred, is recognized as a financial expense in the income statement and directly reduces the carrying amount of the investment.

Provision for Impairment of Investments

A provision for impairment of investments is made when there is clear evidence of a decline in the value of these investments at the end of the accounting period.

Changes in the provision balance are recognized as financial expenses in the income statement.

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT)

3.11 Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses are recognized for amounts payable in the future related to goods and services received, regardless of whether the Corporation has received the supplier's invoice.

3.12 Foreign Currency Transactions

Transactions conducted in currencies other than the Corporation's functional currency (VND) are recorded using the actual exchange rate on the transaction date, based on the following principles:

- Transactions that result in receivables are recorded at the buying exchange rate of the commercial bank designated by the Corporation for customer payments; and
- Transactions that result in payables are recorded at the selling exchange rate of the commercial bank where the Corporation plans to make the transaction.

At the end of the accounting period, monetary items denominated in foreign currencies are revalued using the actual exchange rate at the date of the balance sheet, based on the following principles:

- Monetary items classified as assets are revalued at the buying exchange rate of the commercial bank where the Corporation regularly conducts transactions; and
- Monetary items classified as liabilities are revalued at the selling exchange rate of the commercial bank where the Corporation regularly conducts transactions.

All actual exchange rate differences arising are recognized in the income statement.

3.13 Profit Distribution

Net profit after corporate income tax may be distributed to shareholders after approval by the General Shareholders' Meeting and after the allocation of reserve funds according to the Company's Charter and the provisions of Vietnamese law.

The Corporation allocates the following reserve funds from its net profit after tax, based on the proposal of the Board of Directors and approved by the shareholders at the annual General Shareholders' Meeting:

Investment and Development Fund

This fund is allocated to support the expansion of operations or deep investments of the Corporation.

Reward and Welfare Fund

This fund is allocated for rewarding, providing material incentives, bringing collective benefits, and improving the welfare of employees, and is presented as a liability on the balance sheet.

Dividends

Dividends payable are proposed by the Board of Directors of the Corporation and are classified as a distribution of retained earnings in the equity section of the balance sheet until a resolution is made by the Board of Directors. At that point, dividends will be recognized as a payable liability on the balance sheet.

3.14 Revenue Recognition

Revenue is recognized when the Corporation is able to receive identifiable economic benefits with reasonable certainty. Revenue is determined based on the fair value of amounts received or receivable after deducting trade discounts, devaluation of sale and sales returns. The following specific conditions must also be met when recognizing revenue:

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT)

Sales Revenue

Sales revenue is recognized when the significant risks and rewards of ownership of the goods have been transferred to the buyer, typically coinciding with the point of delivery of the goods.

Service Revenue

Service revenue is recognized when the service has been provided and completed.

Interest Income

Revenue is recognized when interest is earned on an accrual basis (taking into account the return on the asset), unless the collectability of the interest is uncertain.

Dividend Income

Revenue is recognized when the right to receive the dividend payment from the Corporation is established.

3.15 Tax

Current Income Tax

Income tax assets and liabilities for the current year and prior years are determined by the amount expected to be recovered from or paid to the tax authorities, based on the tax rates and tax laws effective as of the end of the reporting period.

Current income tax is recognized in the income statement, except when the income tax arises in relation to an item directly recognized in equity, in which case, the current income tax is also recognized directly in equity.

The Corporation can only offset current income tax assets and current income tax liabilities when it has the legal right to offset the current income tax assets with the current income tax liabilities, and the Corporation intends to settle the current income tax liabilities and current income tax assets on a net basis.

3.15 Tax (Continued)

Deferred Income Tax

Deferred income tax is recognized for temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- ▶ Deferred income tax liabilities arising from the initial recognition of an asset or liability in a transaction that does not affect either the accounting profit or the taxable income (or tax loss) at the time of the transaction; and
- ▶ Taxable temporary differences associated with investments in subsidiaries, associates, and joint ventures when the Corporation can control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets are recognized for all deductible temporary differences, the carryforward of unused tax losses, and unused tax incentives, when it is probable that taxable profits will be available in the future to utilize the deductible temporary differences, tax losses, and unused tax incentives, except:

- ▶ Deferred tax assets arising from the initial recognition of an asset or liability in a transaction that does not affect either the accounting profit or the taxable income (or tax loss) at the time of the transaction; and

NOTES TO THE FINANCIAL STATEMENTS
December 31, 2024

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT)

- ▶ For deductible temporary differences arising from investments in subsidiaries, associates, and joint ventures, deferred income tax assets are recognized when it is probable that the temporary differences will be reversed in the foreseeable future and there is taxable income available to utilize the temporary differences.

The carrying amount of deferred income tax assets must be reviewed at the end of the reporting period and should be reduced to the amount that ensures sufficient taxable income to utilize part or all of the deferred income tax asset. Deferred income tax assets that were not previously recognized should be reviewed at the end of the reporting period and recognized when it is probable that there will be sufficient taxable income in the future to utilize these unrecognized deferred income tax assets.

Deferred income tax assets and deferred income tax liabilities are determined using the tax rates expected to apply to the period when the asset is realized or the liability is settled, based on the tax rates and tax laws effective at the end of the reporting period.

Deferred income tax is recognized in the income statement, except when the income tax arises in relation to an item directly recognized in equity, in which case, deferred income tax is also recognized directly in equity.

The Corporation can only offset deferred income tax assets and deferred income tax liabilities when it has the legal right to offset current income tax assets with current income tax liabilities and deferred income tax assets and deferred income tax liabilities related to income taxes administered by the same tax authority for the same taxable entity, or when the Corporation intends to settle current income tax liabilities and current income tax assets on a net basis, or recover assets simultaneously with the settlement of liabilities in future periods when significant amounts of deferred income tax liabilities or deferred income tax assets are settled or recovered.

3.16 Related Parties

Parties are considered related to the Corporation if one party has the ability, directly or indirectly, to control the other party or to significantly influence the other party in making financial and operating decisions, or when the Corporation and the other party are subject to common control or significant common influence. Related parties may be companies or individuals, including close family members of those individuals.

26. CORPORATE INCOME TAX

The Company is required to pay corporate income tax at a rate of 20% on taxable income.

The Company's tax liability is subject to review by tax authorities. Differences between the reported tax and amounts determined by the tax authorities may arise due to differing interpretations of tax laws and regulations, and the tax liability is finalized based on the official financial statements and decisions made by the authorities.

26.1 Current corporate income tax

Current corporate income tax liabilities are determined based on the taxable income of the current period. Taxable income of the Company differs from the income reported in the financial statements as it excludes income or expenses not taxable or deductible, including items subject to tax at rates different from the statutory rate. The current corporate income tax liability of the Company is calculated at the rate applicable until the reporting date.
